

## Guiding You Through Developing Your Comprehensive Student Record

The hardest part of a comprehensive records strategy, is the strategy. Parchment is partnering with comprehensive student record expert, Dr. Rodney Parks of Elon University, who will provide real-world guidance in how to develop a comprehensive record from the ground up. Determine how to collect and store the information, how to verify it, what it will look like, and how you will offer it to your students and alumni. Once the record has been developed, Parchment will work with you to produce and make available to your learners.

Your partner in helping you represent what students are asking for:

### Together we'll make it simple:

#### GETTING STARTED

- + What do you want to include?
- + How will it be verified?
- + Which departments need to be engaged?

#### DEVELOPING

- + Determine where and how data is stored
- + Design the format and layout (take advantage of Parchment's Visual Transcript capabilities, if desired)

#### DELIVERING

- + Make available as one of the orderable records in Parchment
- + Issue on a consistent basis to your students

Parchment Services, including CSR Services, is part of the comprehensive digital credentials management platform designed help you turn credentials into opportunities.
